# STARTING POINT

## SITUATION

The accounting of the company, such as journal entries, were done by hand.

## CONSEQUENCE

- Poor control of the generated expenses.
- High difficulty to obtain a report by employee, company and expenditure.
- Exhaustive expenses were generated due to the manual accounting of everything.

# PROJECT GOALS

Have an operational report to be able to review the expenses and their reports.

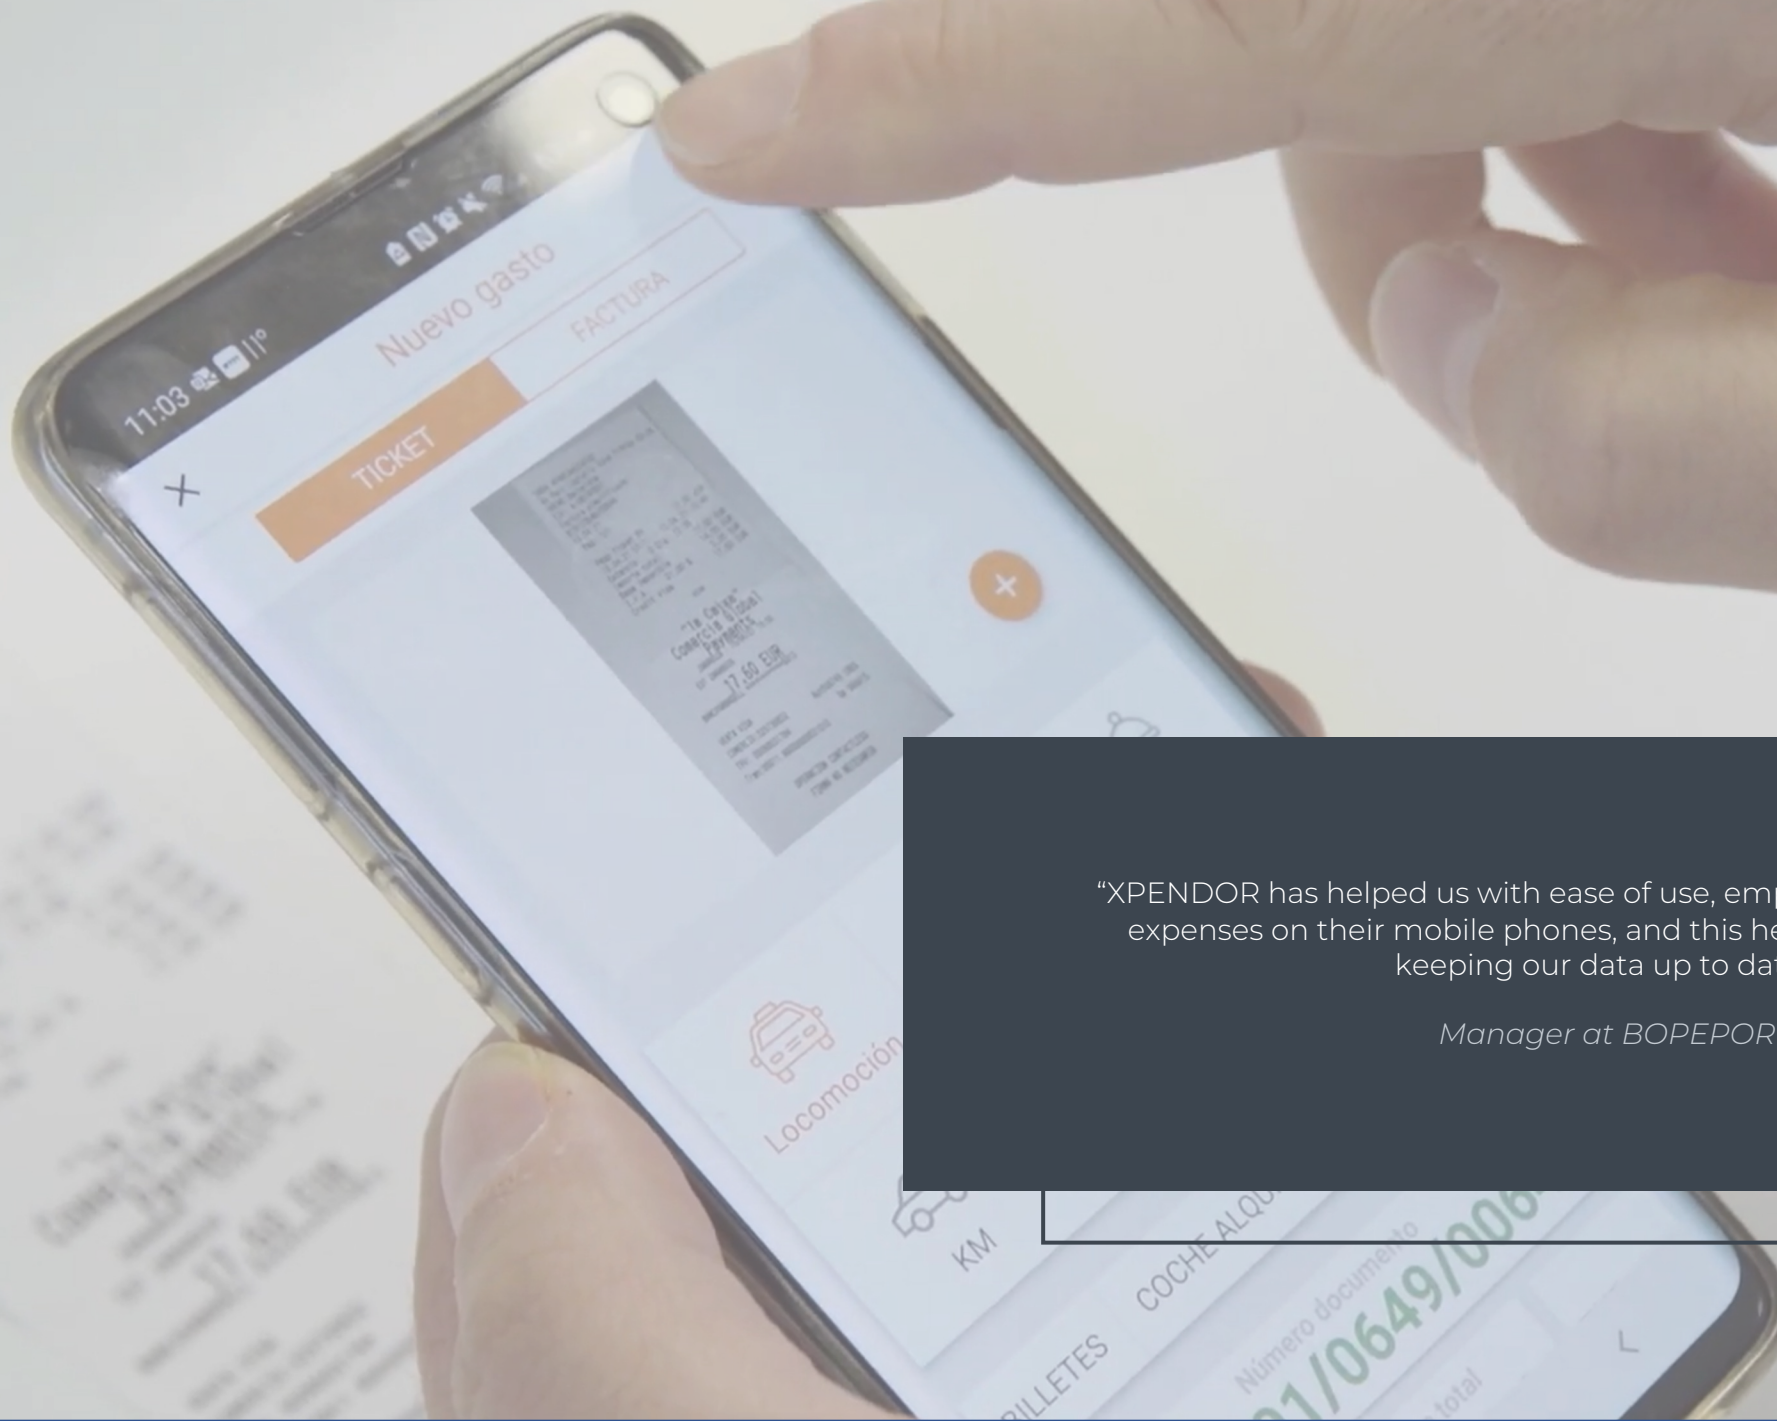

Have the photos of the receipts or invoices attached to the website.

Assign the responsibility to each employee to record and be aware of their expenses.

"XPENDOR has helped us with ease of use, employees can now record expenses on their mobile phones, and this helps us enormously in keeping our data up to date".
